

Viva Energy Gove Airport Jet-A1 Fuel Facility

Construct a new Jet-A1 storage facility to service Australia now and into the future.

Viva Energy is Australia's largest supplier of jet fuel by volume, with a presence in every major airport and an increasing presence in Australia's rural airports. Australia's vast size and relative geographic isolation means that the nation's communities and industries rely on air travel to move people and freight around the country – and the world – quickly, safely, and efficiently.

Considering the importance of trade access and resource delivery to Australia's rural communities, it is important that Viva is able to provide refuelling services in even the most remote airports. The aim of the new installation was to provide facilities to service the current and future of Viva Energy's Aviation business.

The Nqpetro team are experts at delivering remote infrastructure projects that prioritise safety and efficiency. For Viva Energy, the construction of their new Jet-A1 storage facility at Gove Airport required careful planning and extensive, focused safety considerations in order to deliver the project on time, on budget and to the highest quality – meeting all legislative and VEA requirements pertinent to the aviation industry.

Throughout the project, we committed to engaging key local subcontractors to ensure that this project received any available local insights and equally contributed to the local economy. Overcoming the geographical remoteness of the location, Nqpetro

effectively delivered a highly functional Jet-A1 storage facility that will service Viva Energy and the aviation industry in the Gove remote area for years to come.

SOLUTIONS OFFERED

- Project design and construction
- Supply and installation of all:
 - ✓ Civil works
 - ✓ Plumbing
 - ✓ Concreting
 - ✓ Office building
 - ✓ Fencing
 - ✓ Oily water treatment and storage systems
 - ✓ Aviation pipework
- Installation and commissioning of free issue items such as:
 - ✓ Refuelling shelter
 - ✓ Storage shed
 - ✓ Jet-A1 tank and platform
 - ✓ Pump skid
